Sunday Chat: 9 PM ET [Pet Loss Support](#)

Eighth Annual CatHobbyist.com Chat Week **February 26-March 4, 2006**

Saturday March 4

Mary Bruce and Peggy Marks
Guild Certified TTouch Practitioners
Saturday, March 4, at 9 PM Eastern in [Cat Care Central](#)

Mary Bruce and Peggy Marks of [Mindful Tails](#) are Guild Certified TTouch Practitioners in the Long Island & NYC/Tri-State areas. They work with pet owners, shelters, rescue organizations, and animal hospices, offering TTouch as a gentle, positive, non-invasive way to modify behavior patterns and enhance wellness, while training owners to continue the work.

The Tellington Method of Training and Wellness--or TTouch--uses specific circular touches on the skin, which works on the cellular level to release fear and tension and activates the regenerative intelligence of the body. Other series of gentle touch and awareness exercises are also used to help train pets, modify behavior issues, and in support of veterinary care. TTouch can address such issues as: fear of vet visits, groomers or loud noises; chewing, pulling and jumping up; recovery from illness, injury or surgery; basic obedience issues; as well as promoting overall health issues. Many senior animals have also found the rejuvenating TTouch gives them a new lease on life, assisting with such aging issues as stiffness, arthritis and more. It can also be used as an emergency treatment on the way to medical help. TTouch is for all animals and is now being taught as part of a health care curriculum for people in a leading university.
